

SYCLOPE

Electronique

www.mysyclope.com

Keep connected !

Know what is happening in your pools
from wherever you are and
whenever you need to !

www.mysyclope.com is the solution to monitor and configure* in real time and at a distance, all your measurable parameters and alarms. Keep connected to your pools from your computer or Smartphone, wherever you are and whenever you need to.

www.mysyclope.com is:

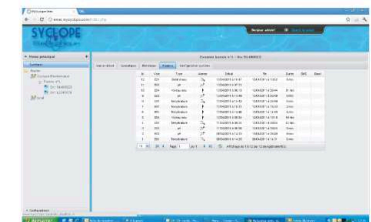

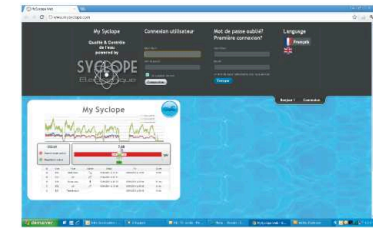

- ✓ Real time access to measurable parameters and alarms from each controller
- ✓ Configuration* of instructions and alarms
- ✓ Sending alerts by SMS or email in case of breakdown
- ✓ Historical access to measured data
- ✓ Historical access to alarms
- ✓ Data graphic visualisation
- ✓ Link from www.mysyclope.com to access the programming and maintenance software (EVACOM – ODICOM – TERCOM – licensed version)

Advantages of **www.mysyclope.com**:

- + Several users with different access levels
- + No limit hierarchial set up of users, pools and/or measuring controller groups
- + Smartphone application

mysyclope.com is only used with the SYCLOPE « communicating » range controllers .

* Following the access level
